

# soilSHOP & Private Well Water Testing

at the Boise Flower  
and Garden Show

- Have you ever had your soil screened for lead?
- Have you had your private well tested for contaminants?
- Test today for free!

Learn if your soil or water is contaminated and how to reduce exposures and protect your family. Idaho Department of Health and Welfare and partner agencies will be on-site to provide education and answer any questions you may have.

Lead Soil Testing

Water Testing

## Soil Testing for Lead

Bring soil from your garden, child's play area, or other places where you may frequently recreate. Bring soil samples in a one-quart plastic bag and we will screen it for lead.

## Water Testing

Bring a 24 oz. water sample from your home faucet in a clean plastic container (or pick up bottles at the event) to test for fluoride, nitrate, arsenic, uranium, manganese, and lead.

De-identified results will be posted on the Idaho Bureau of Laboratories [interactive ground water map](#). Details can be found on the [Environmental Health Website](#).

Improper sampling will result in inaccurate testing results.

Follow the detailed soil and water sampling instructions on our website at:

[Environmental Health | Idaho Department of Health and Welfare](#)

**Additional FREE handouts and resources include:**

- Happy, Healthy, Lead-Free Me! Children's book discussing lead hazards
- Instant lead testing kits for paint and most surfaces
- Radon home tests

**Idaho Department of Health and Welfare will be on-site to share information on Lead, Radon, and Private Well Water.**
